

UHD121 HDMI CONTROLLER HDMI AUDIO AND CONTROL FOR MERIDIAN SYSTEMS

The Meridian UHD121 allows simple integration between Meridian loudspeakers and a TV with an ARC- or eARC-enabled HDMI port.

This compact device provides a simple way for sound from a TV to be fed to a Meridian system, while enabling the TV and Meridian speakers to communicate with each other, switching each other on and off and sharing volume control commands – all from a single remote.

THE UHD121 AT A GLANCE

Extracts audio from an eARC or ARC-capable HDMI connection. Supports CEC for integrated control.

SpeakerLink connections for use with Meridian loudspeakers or Meridian Controller products.

Compact design enabling installation in small spaces, such as a wall-mounting box for a TV.

Easy to install, UHD121 is supplied ready for use in many applications, with no additional configuration required in most cases.

Powered via SpeakerLink* or from external PSU.

USB connection for use with third-party control systems via Meridian's standard Automation Interface.
